

- PORCELAIN BUSHING ASS'Y OF Disconnecting Switch

© Technical Data

All specification & ratings meet IEC60265-1

| Description                             | Specification                            | Remarks                             |
|-----------------------------------------|------------------------------------------|-------------------------------------|
| Rated Voltage                           | 25.8kV                                   | IEC60265-1<br>Refer to buyer's spec |
| Rated Current                           | 630A/MAX.2000A                           |                                     |
| Impulse Withstanding Voltage (1.2/50μS) | 150kV                                    |                                     |
| Power Frequency Withstanding Voltage    | 60kV                                     |                                     |
| Gas Tightness                           | Subclause 5.17 of IEC60694 is applicable |                                     |
| Dimension A.B.C                         | Refer to buyer's spec                    |                                     |
| Customer                                | KEPCO / Overseas                         |                                     |
